Exercise 1: Audio Player 🎵

Goal: Create a simple audio player for a podcast episode.
Instructions:

1. Add an `<audio>` tag to your HTML.
2. Use an MP3 file of your choice as the audio source (e.g., "podcast.mp3").
3. Make the controls visible to the user.
4. Add a fallback message for browsers that don't support the `<audio>` tag.

```html
<!-- Your Task: Complete the audio tag below -->
<audio controls>
    <source src="your-audio-file.mp3" type="audio/mpeg">
    Your browser does not support the audio element.
</audio>
```

```
<!-- Your Task: Complete the audio tag below -->
<audio controls>
    <source src="your-audio-file.mp3" type="audio/mpeg">
    Your browser does not support the audio element.
</audio>
```

Exercise 2: Video Player 🎥

Goal: Embed a video of your favorite movie trailer or tutorial.
Instructions:

1. Use the `<video>` tag.
2. Provide both MP4 and WebM formats as sources for compatibility.
3. Add controls, autoplay, and set a poster image (e.g., "poster.jpg").
4. Include a fallback message for unsupported browsers.

```html
<!-- Your Task: Complete the video tag below -->
<video controls autoplay poster="your-poster.jpg" width="640" height="360">
    <source src="your-video-file.mp4" type="video/mp4">
    <source src="your-video-file.webm" type="video/webm">
    Your browser does not support the video element.
</video>
```

```
<!-- Your Task: Complete the video tag below -->
<video controls autoplay poster="your-poster.jpg" width="640" height="360">
   <source src="your-video-file.mp4" type="video/mp4">
   <source src="your-video-file.webm" type="video/webm">
   Your browser does not support the video element.
</video>
```

Exercise 3: Embed Content 🌐

Goal: Embed a Google Map location or a YouTube video into your webpage.
 Instructions:

1. Use the `<iframe>` tag.
2. If embedding a map, use the embed code from Google Maps for a location.
3. If embedding a YouTube video, use the share > embed option from YouTube.
4. Set the width to 800px and height to 450px

```html
<!-- Your Task: Replace the src attribute with the embed link -->
<iframe src="https://your-embed-link.com"
        width="800"
        height="450"
        frameborder="0"
        allowfullscreen>
</iframe>
```

.

```html
<!-- Your Task: Replace the src attribute with the embed link -->
<iframe src="https://your-embed-link.com"
     width="800"
     height="450"
     frameborder="0"
     allowfullscreen>
</iframe>
```

Bonus Challenge

Combine all three tags into one webpage!
Let me know how it goes or if you'd like me to review your code. 😊
